Course Description

INTS 200: Internship

An internship is a high impact learning experience where students immerse in a professional setting for academic credit. Students shadow, volunteer or work in a private company, organization or government agency within the local community, nationally or abroad. The semester prior, students are assisted in preparing their application materials, and in the search and application process. During the semester of the internship students follow a course curriculum including, 40 contact hours at the host site for each credit registered, participation in classes or meetings, completion of homework assignments that support student learning and career reflection, and end of semester evaluations. Internships culminate in a letter grade determined by the above criteria. First or second year standing required. Written approval of course instructor required prior to the internship semester.

3.000 TO 4.000 Credit hours

Instructor: Cynthia Simon

University of New England
