ISBN-13: 978-0674391765

Publisher: Harvard University Press; 4th Edition

Publish Date: (January 31, 1988)

Citation: Bok, D. C. (1986). *Higher learning*. Cambridge, Mass: Harvard University Press.

Synopsis:

Bok concludes that the competition for the best students, the most advanced scholarship, the most successful scientific research, the best facilities--has helped to produce venturesome, adaptable, and varied universities. But because the process of learning itself is imperfectly understood, it is difficult to achieve sustained progress in the quality of education or even to determine which educational innovations actually enhance learning.
